

**64th ERSA Congress “Regional Science in Turbulent Times. In search of a resilient, sustainable and inclusive future”
26 to 29 August 2025 (onsite participation only).**

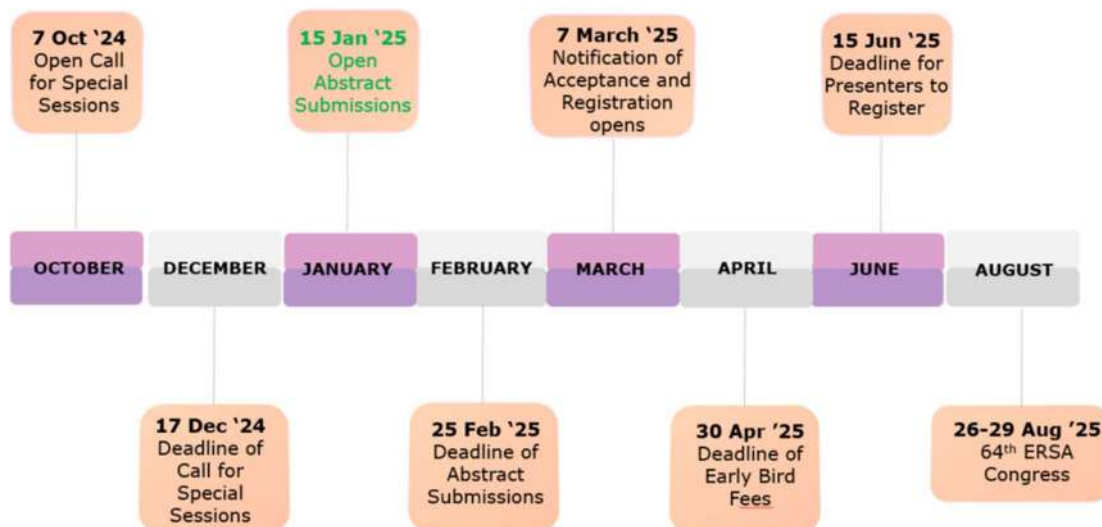

Event Overview

The 64th ERSA Congress will be held from 26 to 29 August 2025 with onsite participation only. The ERSA2025's edition will focus on “Regional Science in Turbulent Times. In search of a resilient, sustainable and inclusive future”. This theme is explicitly related to the contemporary challenges that people and places are facing today and to how Regional Science can reflect and interact with these challenges. The economic crisis, the refugee crisis and the pandemic are some representative examples of the unprecedented intensity and prolonged duration of the sequential crises that have been experienced. The field of Regional Science is made up of a dynamic association of scientists and policy makers who are engaged in understanding, analyzing, and promoting policy proposals that will lead to a more resilient and inclusive future for people and places across the globe.

With approximately 800 participants every year from all continents, the ERSA Congress has become the largest academic conference in regional science worldwide, providing a place to present your research results, get precious feedback and network as well as find out about new developments in the field, and also meet colleagues and friends.

Currently, the Congress is accepting proposals for Special Sessions, with a submission deadline of December 17, 2024. Key dates for subsequent phases of the Congress are outlined in the timetable below:

The Congress Chair, Professor Yannis Psycharis, and the Organizing Committee cordially invite members of the Regional Science community to participate in the 64th ERSA Congress in Athens. This event will bring together diverse perspectives to foster creative and innovative solutions to regional challenges. Attendees will benefit from a dynamic environment, gaining insights from keynote speakers and colleagues alike, while building connections, sharing experiences, and exchanging ideas.
